

WORKFORCE PARTNERSHIP

**ASTRONAUT
SCHOLARSHIP
FOUNDATION**

CREATED BY THE MERCURY 7 ASTRONAUTS

How much does your company spend on recruiting?

How much time is invested in vetting the right candidates?

ASF has 30 years of experience and a proven track record of identifying and supporting some of the best and brightest STEM undergraduate students in the United States. The accomplishments of our over 400 alumni have profoundly impacted our nation through technological innovations in health care, energy, defense, aerospace, homeland security, and so much more.

The goal is to grow the number of qualified candidates by partnering with corporations that focus on STEM. Together we can strengthen the talent that will be available for tomorrow's workforce. As we increase the number of universities and scholar participants, establish internships, employment opportunities, and build a network of leading employers, we will advance America's global competitiveness and future.

Corporate partners will have a unique opportunity to:

- ◆ Engage with some of the best and brightest STEM university students
- ◆ Be among the first to recruit from this talent pool
- ◆ Have a hands-on approach to developing tomorrow's STEM workforce

Collectively, corporate partners will provide support to invest in the lives of elite university STEM students. Those students, in turn, will help build the strong workforce needed to keep America innovative and encourage companies to remain in the United States.
